Carefully Designed, Enriching Learning

This issue of "Joyful Sprouts" highlights "Diverse Learning at Ka Fuk," showcasing our kindergarten's steadfast commitment to holistic child development. Every activity—whether conducted on campus or off-site—is thoughtfully designed with a child-centered approach and **arranged with care**. Through these enriching experiences, children are empowered to learn actively, engage wholeheartedly, develop cooperative skills, show kindness, build confidence, and grow in knowledge, abilities, and attitudes.

We thoughtfully design a wide range of activities that align with children's life experiences, learning interests, and developmental needs across all age groups. Beyond the diverse learning opportunities offered on campus, we also extend classroom knowledge through off-site experiences. For example, during K2's "Science Museum" design project, we arranged field trips that encouraged hands-on exploration, enriching the learning process while enhancing enjoyment and motivation. Likewise, the K1 class's exploration activity at North District Park complemented the "Nature" theme, enabling children to build knowledge through outdoor play and discovery—fostering a spirit of self-directed learning.

Starting next semester, the school will rent the basketball court at Ka Shing Court to offer enriching physical activities for children in K1–K3. Under the guidance of Coach Lam and our dedicated teachers, students will engage in outdoor physical training and mini-tennis sessions. These activities not only provide opportunities to enjoy fresh air and sunshine but also support children's physical and mental well-being while boosting their immune systems. Moreover, they help nurture essential skills such as focus and attentive listening, and foster character strengths including determination, self-control, and team spirit.

In addition, to provide children with a fresh and enriching experience, the K3 class will have the opportunity to explore Wing Chun this year. Wing Chun is a traditional Chinese martial art that emphasizes using gentleness to overcome force. Through this practice, children will gain a deeper appreciation for Chinese martial arts culture while developing patience and discipline. As they come to understand that mastering each movement requires consistent and focused practice, they will also cultivate a spirit of perseverance and resilience.

At Ka Fuk, we are committed to offering children rich and meaningful learning experiences—where exploration sparks curiosity and active participation deepens understanding. We encourage parents to **wholeheartedly** engage in every step of their child's learning journey, recognizing and celebrating their efforts and progress. Your encouragement and affirmation are powerful motivators that inspire children to grow with confidence and continue striving forward.

Concerns I: Little Soldiers of Christ

This year's focus initiative, the "Little Soldiers of Christ" program, aims to deepen children's understanding of God the Father, nurture a heart of gratitude and constant joy in them, and help establish correct values. Teachers organize morning assemblies to encourage children to joyfully participate in singing hymns, praying, and learning biblical truths and God's words through Bible stories. Furthermore, in the religious activity corner, children engage with Bible story puzzles, crafts, scripture verse cards, gratitude activities, and reading religious books. These activities strengthen their knowledge of the Bible, cultivate a habit of giving thanks in all circumstances and maintaining joy, practice loving God and others, and bring the gospel to their parents and those around them.

"Give thanks in all circumstances" - this is for our principal!

This religious picture book is so interesting!

I recited the Bible verse for my teacher!

Of course, singing hymns is even better with musical instruments! Every day, my heart is full of gratitude!

Concerns II: Character Education Campus Program

This year's key focus, the "Character School Program," aims to nurture children's character strengths of "benevolence" and "courage" through positive character education. By organizing parent-child activities both at school and at home, children are encouraged to practice and accumulate character-building experiences in their daily lives through various small tasks. For example, teachers use stories, games, corner activities, drama, and mixed-age activities to inspire children to express gratitude through words and actions, proactively help others, share toys with peers, and care for others. This helps enhance their positive character traits and strengthen their inner qualities.

Look How Amazing We Are!

Is my courage doll cute?

We are the little angels of kindness!

Let me help you!

I'll draw a courage badge for you! Helping to clean up is so much fun!

Sharing brave little stories.

PN Little Hands, Big Learning

Though the PN class is the youngest in the school, these little learners are full of courage and curiosity. With the guidance of our dedicated teachers, they've been exploring fine motor and self-care activities—like gripping clothespins, twisting dice toys, and threading chunky beads. Their fingers are growing stronger every day! They're also learning self-care skills such as putting on shoes, washing hands, and enjoying meals independently. These adorable milestones are big steps toward independence and readiness for K1.

We used clothespins to give the kitten some whiskers!

We put colorful pom-pom balls into test tubes!

Big challenge: trying to solve the twisty puzzle cube!

We rolled modeling clay into a snake!

We carefully colored the fruits with crayons!

We strung beautiful chains with wooden beads!

We're all grown up and can change our shoes by ourselves!

Eating with a spoon is no problem at all!

We know how to wash our hands with soap by ourselves!

K1 Nature Learning Journey

As part of our "Nature" themed design activity, the K1 class explored the fascinating world of butterflies! We learned about their body structure, unique characteristics, life cycle, food sources, and natural habitats through engaging lessons and hands-on activities. To bring our learning to life, we went on an exploration trip to North District Park, where we enjoyed the beauty of spring and observed a variety of plants, insects, and animals in their natural environment. Come take a look at our activity highlights and see how we've been learning through nature!

We studied the butterfly's body structure carefully.

Sharing information! We shared butterfly facts with each other!

The insect specimens are so interesting, and we learned about their growth process.

The exhibition area has different plants and small insects!

We used sponge printing to create dancing butterflies.

The butterflies we made can fly!

We made honey lemon tea with honey - it's so delicious!

We discovered that real honey shows a honeycomb pattern when shaken!

K2 The Joy of Self-Directed Learning

Our K2 children are truly blessed! Whether on campus or out exploring the community, the school thoughtfully arranges a wide variety of engaging visits and learning activities. These experiences open up new horizons and offer countless opportunities for joyful discovery, hands-on exploration, and meaningful growth.

Visit to the Yakult Factory:
Learning about the digestive system and the manufacturing process of Yakult.

Science Museum Exploration
Trip: Discovering new and interesting things.

Our teacher invited an expert to the school to learn about the "TOY REBORN" method.

Trip to the Sunny Smiles Little Garden:
Learning ways to protect our teeth.

A visit from the little dog Haha taught us how to take care of puppies.

Putting effort into practice,
learning by doing, and personally
experiencing the recycling process.

Showcasing Talents Through Exciting Activities

The children in Class K3 are full of enthusiasm for learning and eager to take on new challenges. Our school provides a wide variety of enriching activities—such as **outdoor tennis training, creative dance, and Wing Chun martial arts**—that help them grow, discover their strengths, and shine in their own unique ways.

Our young learners thrive in the fresh air, embracing outdoor physical activities with enthusiasm and energy. Under the expert guidance of Coach Lam, they've made impressive progress in their mini-tennis training—mastering the techniques of serving and receiving with skill and confidence. Beyond tennis, the children engage in a variety of movement drills and fitness games designed to help build strong, healthy bodies—and even stronger spirits!

Dance is a powerful aerobic exercise that boosts physical health and creativity. Miss Wong uses playful activities to teach children body movement techniques. Collaborating with peers, they invent diverse dance steps, expressing themselves through graceful postures and energetic moves.

Wing Chun is a traditional Chinese martial art that has grown in popularity. Our school is honored to welcome Master Yu, a certified instructor from the Wing Chun Sports Association, to teach children this discipline. With rich teaching experience, Master Yu uses mnemonics and drills to help students quickly grasp correct stances and techniques. The children show great enthusiasm and focus, fully engaging in every class!

Parent-Child Game Day

We celebrated Mother's Day with a joyful family event at Wu Kai Sha Youth Village. Parents and children teamed up for lively physical games, with parents enthusiastically showing off their skills. A special orienteering activity designed by our teachers led children through the campground, where they explored plants, cabin colors, and facilities. One memorable challenge had them recite golden phrases from the Green Lion Pavilion. The children were fully engaged, creating lasting memories with their families. Please enjoy our behind-the-scenes footage!

時光飛逝，慧冰已經差不多完成K2課程。雖然有很多事情仍需學習，但相比剛到學校時已進步良多。這真的有賴校長老師在校的努力及愛心；當遇到教育問題時，老師亦有給予合適意見。在此希望慧冰能在學校繼續成長及有所得著。

不知不覺你就快幼兒園畢業啦！發現你變得很特別，有很多「古靈精怪」的想法，又有點「長氣」，有時很「暖男」，懂得體諒別人，感恩一路陪伴你成長非常好的校長老師姐姐，還有一班非常可愛的同學。感恩有你們，祝你們健康平安快樂！

之前看到欣瑜在家裡讀著姐姐以前幼稚園，上面圖畫下面生字的字卡，我就驚訝問欣瑜為甚麼懂這麼多生字，欣瑜答，我看圖畫讀之嘛。升讀K1學校推出朗讀計劃，欣瑜把整本圖書讀了一次給我聽，然後叫我簽名，我一邊簽名一邊問欣瑜為甚麼懂這麼多生字？欣瑜說，老師教的，我還讀了一次給老師聽。說完已經拿著圖書走去讀給媽媽和姐姐聽。我才知道欣瑜會讀這麼多生字原來是朗讀計劃、親子閱讀和多元學習在嘉福培養成的閱讀習慣，感恩欣瑜在嘉福的成長，感謝校長、主任、老師和媽媽們的付出！

話咁快承佑準備上K1了，每次睇幼兒生活紀錄評估都樂在其中，眼見每個月承佑都有成長一些就很欣慰。承佑在家中都很自律，每日都講要做功課，他口中所講的功課其實就係讀圖書，這種自律離唔開學校的環境氛圍影響及這個學期令我感到非常進步的一件事就係識唱歌啦，這是以往都未能做到，真係非常開心，感謝各位老師同各位媽媽們的悉心照顧，感恩總行的安排可以遇到大家。
